

RUSLAN GABZETDINOV

gabzetdinov@proton.me | t.me/gabzetdinov_job | github.com/crispuscrew

SUMMARY

Systems software engineer with 3+ years of experience in embedded and robotics domains. Currently developing in Go and C/C++ at a robotics company, with a focus on Go backend and systems engineering. Background in ARM Linux, embedded systems programming, and cross-team coordination.

EXPERIENCE

Software Engineer

LLC Gumich RTK

Jan. 2025 – Present

Moscow, Russia

- Refactored and extended a 2M+ LOC **Qt/QML** ground control station for robotic systems: custom QML screens and C++ integrations in a 7-person team
- Designed and implemented an internal **artifact storage service** in Go: REST API, Redis for metadata, Docker volume as file store, consumed by a React frontend - replaced manual binary distribution
- Developed a USB-over-IP relay on **Orange Pi** (ARM Linux) for the SDR subsystem, achieving **80 MB/s** sustained I/Q throughput

Software Engineer (Contract)

LLC Ground Avionics

Sep. 2024 – Jan. 2025

Moscow, Russia

- Designed system architecture and developed the **Flutter** operator interface with a custom **WebSocket** protocol for real-time ROS integration

CAE / Software Engineer

LLC Indicative Engines

Mar. 2023 – Aug. 2024

Sarov/Moscow, Russia

- Developed **C++** firmware for an **STM32F407**-based liquid rocket engine test stand: sensor data acquisition, SD logging, and UART telemetry output
- Implemented deorbit re-entry time calculation software in **Python/NumPy**
- Won grant competition by **PJSC RSC Energia** and accelerator program by **PJSC Gazprom Neft**

PROJECTS

pgxray

Go, TUI, PostgreSQL

github.com/crispuscrew/pgxray

- Keyboard-driven read-only TUI for exploring PostgreSQL, designed to run on the server and accessed over SSH - no port forwarding or local client setup
- Component-based **Bubble Tea v2** architecture: schema browser and live table data viewer
- All queries run in **REPEATABLE READ** read-only transactions - consistent snapshot with no risk of accidental mutation

Amnezia-Ansible

Ansible, DevOps

github.com/crispuscrew/amnezia-ansible

- Ansible playbook for automated **WireGuard** VPN provisioning in Docker: idempotent per-client key and config generation, stable IPs across re-deploys
- Multi-distro support (Debian, RedHat, Arch, Alpine) - from bare VPS to running VPN in a single command

TECHNICAL SKILLS

Languages: Go, Python, SQL

Technologies: WebSocket, Ansible

Databases: PostgreSQL, Redis, SQLite

Developer Tools: Git, GitHub Actions, GitLab CI, Docker / Podman, Linux

EDUCATION

M. V. Lomonosov Moscow State University

Diploma, Computational Mathematics and Computer Science

Moscow, Russia

Aug. 2020 – Jun. 2022

National University of Science and Technology MISIS

Specialist in Geoinformatics, Expected 2029

Moscow, Russia

Aug. 2022 – Jan. 2029
